+62 857 9151 4810 | wdyapramestika@gmail.com | [linkedin.com/in/widiyatika](https://www.linkedin.com/in/widiyatika) | [Portfolio](#)

I'm a motivated and detail-oriented data enthusiast with hands-on experience in data cleaning and organization using tools like Google Sheets and Python. During my internship as a Data Analyst, I transformed raw data into meaningful insights, cleaned and prepared datasets, and presented key findings through clear charts and reports. I also enjoy sharing knowledge previously serving as a teaching assistant, where I helped students understand programming fundamentals. I'm eager to continue growing and contribute to a team that values data-driven decision-making.

EDUCATION

Binus Online - Jakarta, Indonesia

Feb 2026 – Now

Bachelor in Data Science, GPA:

Telkom University - Bandung, Indonesia

Aug 2022 – Jul 2025

Diploma in Information Systems, GPA: 3.94/4.00 (Cumlaude)

ACHIEVEMENTS

- **Passed Funding Stage Program Kreativitas Mahasiswa 2023 “PKM”** - Successfully securing funding for the Program Kreativitas Mahasiswa competition in 2023 category for the Application of Science and Technology “PKM-PI”.
- **Finalist Jogjajanan Business Plan Competition 2025** - Selected as a finalist in the Jogjajanan Business Plan Competition 2025, organized by the Faculty of Agriculture and the Faculty of Economics at Universitas Gadjah Mada.
- **Bank Indonesia Scholarship Awardee 2024–2025** - Selected as a recipient of the Bank Indonesia Scholarship Program based on academic achievement, leadership potential, and community involvement.

PROJECTS

Automation Data Cleaning (Fuzzy Matching)

Jan 2025 – May 2025

Data Science Project

This project focused on automating text data cleaning using fuzzy matching techniques to handle inconsistent and unstructured entries. The objective was to reduce manual workload and improve data processing accuracy.

- Automated text cleaning and normalization processes using Python, Pandas, and NumPy.
- Applied fuzzy matching algorithms (e.g., RapidFuzz, FuzzyWuzzy) to detect and reconcile inconsistent or duplicate records.
- Improved overall data-processing efficiency compared to manual cleaning workflows.
- Enhanced data reliability for downstream analytical and reporting needs.

Prediksi Genre Musik (Major/Minor)

Jun 2024 – Aug 2024

Data Science Project

This project focused on predicting musical genre characteristics (major vs. minor) using machine learning techniques and audio feature analysis. The goal was to understand how musical attributes influence genre classification and to build a reliable predictive model.

- Analyzed key musical features such as tempo, energy, mode, and other audio attributes.
- Built a classification model using machine learning methods to predict genre categories (major/minor).
- Performed data preprocessing, feature selection, and model training to improve prediction accuracy.
- Evaluated model performance using accuracy metrics and supported findings with clear data visualizations.

E-Literasi (Project Manager – Flutter App)

Jun 2024 – Aug 2024

Mobile Development Project

This project focused on developing a digital reading application designed to improve accessibility and engagement with online book content. As Project Manager, you led the development process and coordinated cross-functional collaboration.

- Led the end-to-end development of a digital reading application built using Flutter.
- Coordinated with developers and UI/UX designers to ensure smooth workflow and alignment with project goals.
- Defined project timelines, deliverables, and task assignments to maintain development efficiency.
- Oversaw feature planning and ensured the app met usability and performance requirements.

Traco: Smart City Transportation System Based on Mobile Application in Realizing Bandung City as a Smart City

Apr 2023 – Okt 2023

- Frontend
- Traco was a project I developed as part of the 2023 Student Creativity Program (PKM) competition, which successfully received funding. The project aimed to support Bandung City in realizing the Smart City concept through a mobile-based smart transportation system.
- Managed version control and code collaboration using Git and GitHub.
 - Conducted unit and UI testing to ensure smooth application performance without bugs.
 - Developed as part of the 2023 PKM competition, successfully received funding.

POS Toko (Python)

Nov 2022 - Mar 2023

- Software Development Project
- This project focused on building a simple Point of Sale (POS) application to manage small-store operations, including product inventory and basic transaction handling.
- Developed a simple cashier application using Python for desktop-based operations.
 - Implemented CRUD features for managing product data and processing transactions.
 - Structured the application using modular programming practices to ensure maintainability.
 - Successfully completed the system prototype according to research requirements and internship timeline.

EXPERIENCE

Kupu.id – Jakarta Pusat

Feb 2026 – Jun 2026

- Data Annotator
- Annotated and labeled traffic signs, vehicles, traffic lights, and road objects for Computer Vision and Autonomous Driving datasets.
 - Ensured high annotation accuracy and consistency to improve AI model training performance.
 - Performed quality assurance and validation on labeled datasets following strict annotation guidelines.
 - Collaborated with QA teams to maintain dataset reliability and reduce labeling errors.

Level Up by Telkom Indonesia- Semarang, Jawa Tengah

Aug 2024 - Aug 2025

- Data Analyst Intern
- Managed, cleaned, and organized large datasets using spreadsheets and Python.
 - Exported and submitted processed data regularly to the HCComm data team for integration into the Talent Management System platform.
 - Built an automated data-cleaning system to improve efficiency and reduce manual processing.
 - Developed a performance-tracking dashboard using spreadsheets to evaluate the productivity of each team member

Teaching Assistant In Algorithms And Computer Programming- Telkom University,Bandung

Sep 2023 – Mar 2024

- Coordinator of Teaching Assistant
- Coordinated communication and workflow between lecturers, practicum assistants, and the faculty laboratory.
 - Provided guidance to practicum assistants to ensure timely and accurate submission of required documents.
 - Assisted lecturers in delivering learning materials and supporting students' understanding of basic programming concepts.
 - Evaluated students' practical work and provided constructive feedback on their progress.
 - Prepared and compiled the final practicum assistant report for academic documentation.

Student Activity For Research And Competition Handling (SEARCH)- Telkom University,Bandung

Jan 2023 - Mar 2023

- Member of Human Resources Club Study
- Supported organizational initiatives related to student research and national competition preparation.
 - Assisted in coordinating internal development programs for members, focusing on skill growth and competition readiness.
 - Collaborated with the Human Resources division to manage member activities and maintain organizational structure.
 - Participated in organizing workshops and training sessions to enhance student competency in research

and competition fields.

Student Creativity Program (PKM) – Telkom University,Bandung

Apr 2023 – Oct 2023

Incentive Funding • Proposal Competition leading to PIMNAS

- Analyzed system requirements to ensure alignment with project objectives and user needs.
- Designed system architecture and prepared detailed technical specifications for implementation.
- Conducted financial analysis to estimate project costs and ensure budget feasibility.
- Developed financial strategies to optimize resource allocation and project sustainability.
- Prepared comprehensive financial reports for submission and evaluation.

THE SPORA – Design & Creative Studio Startup- Telkom University,Bandung

Oct 2023 - Mar 2024

Creative Designer — The Spora

- Designed product packaging aligned with brand identity and market targets.
- Created promotional posters for both digital and print needs.
- Produced and edited marketing videos to support brand campaigns and client projects.
